

ELECTROPLATING CHEMICALS

ACTIVATORS - Surface activators, acid salts, inhibitors, and descalers
ALUMINUM ANODIZING - Acidic and alkaline cleaners, etchants, deoxidizers, hardcoat additives, fume suppressants, sealants, chromate conversion coatings, and dyes
BLACK OXIDE - Steel, stainless steel, copper, hot and room temperature
BRIGHT DIPS - Aluminum, brass, copper, stainless steel, steel, and zinc
CADMIUM BRIGHTENERS - Cyanide and acid formulations
CHROMIUM CHEMICALS - Hexavalent chrome, trivalent chrome (sulfate and chloride based), black chrome and hex-chrome alloy replacements
CLEANING COMPOUNDS - Soak cleaners, electro cleaners, spray cleaners, solvents, semi-aqueous, immersion and ultrasonic formulations
COPPER BRIGHTENERS - Semi and full bright cyanide, strike formulations, alkaline non-cyanide copper and high-leveling acid copper systems
CORROSION PREVENTATIVES - Aqueous and solvent based systems, water displacing, dry-to-the-touch, waxes and torque and tension final finishes
DESCALERS, DEOXIDIZERS, DESMUTTERS - Chrome free, fluoride free, tri-acids
ELECTROLESS NICKEL - High, mid and low phosphorus baths, alkaline nickel strikes, RoHS compliant, Teflon, boron, silicon carbide composites and more
ELECTROPOLISH - Stainless steel, aluminum, copper and brass alloys
METAL STRIPPERS - Compounds for all metals, peroxide, NBS, NMP, ammoniated, and other technologies
PHOSPHATES - Calcium modified and heavy zinc, iron, manganese, zirconate, titanate and vanadate based alternatives, spray and immersion types, non chrome sealants and topcoats
NICKEL BRIGHTENERS - Semi-bright, bright, high leveling, high sulfur, sulfur free, micro porous, deep throw, and sulfamate formulations
TIN PLATING ADDITIVES - Matte, semi-bright or bright, sulfate, fluoroborate, and MSA tin, whisker mitigated tin, tin-zinc, and tin-nickel alloy formulations
VIBRATORY COMPOUNDS - Burnishing, descaling, accelerated deburring, cleaning and polishing chemistries for mass finishing
WASTE TREATMENT CHEMISTRY - Coagulants, sequestering agents, flocculants, defoamers and precipitating agents
ZINC BRIGHTENERS - Cyanide, alkaline non-cyanide, acid chloride zinc, alkaline zinc-iron, acid zinc-cobalt, acid and alkaline zinc-nickel, and tin-zinc brighteners
FINAL FINISHES - Clear, iridescent yellow, olive drab and black chromates, RoHS compliant clear, yellow and black passivates, non-chromate topcoats, lacquers, silicates, nitrites, waxes, oils, Teflon and other sealants

VENDORS

A Brite Company / Atotech USA, Inc. / Coventya (Sirius Technologies and Taskem)
Coral Chemical Company / Electrochemical Products, Inc. / US Specialty Color Corp
