

LUBRICATION PRODUCTS

STRAIGHT SYNTHETIC OILS – Synthetic oils with properties suited for cold heading, drawing and forging operations

SOLUBLE OILS – Formulated for bio-stability, highly stable emulsion packages with anti-foam, rust preventative and anti bacterial packages

SEMI-SYNTHETIC – Water dilutable formulas for grinding, cutting, general machining and difficult drawing applications

SYNTHETIC CUTTING & DRAWING – Water dilutable synthetic compounds for cutting, bending, grinding and difficult drawing applications

WAY OILS – Paraffinic based oils on sliding machine ways (32/70/100/230 viscosities)

SPINDLE OILS – Highly refined oils on high speed spinning and twister bearings (2/5/10/22 viscosities)

H.E.P GEAR OILS – High viscosity index based oils containing sulfur and / or phosphorous additive packages for enclosed gears, chains and sprockets (60/100/150/220/460/680 viscosities)

AW HYDRAULIC OILS – Inhibited hydraulic oils designed for service in piston, gear and vane pumps over 1,000 psi and speeds over 1,200 RPM (22/32/46/68/100 viscosities)

PREMIUM HD MOTOR OILS – Designed to handle gasoline and diesel engines (HD20/HD30/HD40 and HD10W30/HD10W40/HD15W40)

TURBINE & HYDRAULIC OILS – Recommended for machine tools, air compressors, circulating oil systems and hydraulics at less than 1,000 psi and/or 1,200 RPM (32/46/68/100 viscosities)

STRAIGHT MINERAL OILS – Screw machine oils (steel, copper, brass, aluminum) – WocoCut SM 200 and WocoCut SM 100

Screw machine oils (stainless steels, titanium) - WocoCut 165/ Wococut176/ WocoCut 216 formulated with sulfur, chlorine and / or synthetic lubricating additives

VANISHING OILS – Used for blanking, bending and stamping; containing various levels of additives

RUST PREVENTATIVES – Dry film lubricants, dry to touch oils, waxes, water displacing oils, water soluble oils, amines, nitrate based, silicate based and final finishes for bare steel, plated parts, phosphates, black oxides and copper and copper alloys

PARTS CLEANERS – Including solvents in vapor degreasers, aqueous, semi-aqueous, acid and alkaline cleaners for spray, dip, ultrasonics, heat treatment, phosphates, and black oxides

VIBRATORY FINISHING – Media, compounds and rust preventatives used in bowls, centrifugal disks, tumblers, tubs and high energy equipment

VENDORS include: A Brite Company / Coral Chemical Company / Wallover Oil Company Argent LTD / Finishing Associates, Inc. and many others available upon request
